Compact 600 LED mirror M50 Compact 900 LED mirror M60

<u>IMPORTANT</u>: This unit must be securely fixed to a wall. Ensure that the top is horizontal before marking the wall for fixing. The wall fixings supplied may not be suitable for your installation. You may need to source alternatives depending on the material and strength of the wall you are fixing to.

CONNECTION TO THE ELECTRICITY SUPPLY: It should be connected to the household fixed wiring by a qualified electrician in accordance with the national Wiring Regulations (BS.7671). It can either be connected to the same lighting circuit as existing bathroom lighting, controlled by the same switch, or it can be connected independently to the general lighting circuit by installing its own switch (not supplied). The transformer is Class II and does not require earthing.

<u>Care and Maintenance</u>: This is a wood product, and has a water resistant finish. It should not be left wet, and the quality of the finish is best maintained if it is wiped with a dry cloth after use. It should only be cleaned using a soft damp cloth followed by a dry cloth. Do not use bleach or any abrasive cleaner.

Parts Supplied:

Please follow this step to connect the demister pad if any. Remove the back cover of the sensor and connect cables according to above diagram. Then put the cover back on.

The product must be installed with a minimum distance of 150mm between the infrared sensor and an adjacent countertop or obstruction to ensure correct function of the sensor.
