FLO - BathTaps

Installation & Aftercare Instructions

Installation Procedures

TOOLS NEEDED: Adjustable spanner , PTFE tape

- 1) Prior to installation flush out the pipe work to remove debris and then ensure the water supply is turned off.
- 2) Refer to diagram and ensure all components are present.
- 3) Fit the taps to the bath ensuring the rubber washer and fixing nut are on the underside of the bath.
- 4) Connect to the water supply, ideally using PTFE tape on the threads to form a watertight seal. The hot water supply should always be connected to the left hand leg.
- 5) Fully open both valves and allow to run for approximately 1 minute to fully flush the system.
- 6) Check all connections for leaks.

Aftercare Instructions

Whilst the item has a high quality durable finish, it should nevertheless be treated with care. Surfaces should be cleaned only using a soft damp cloth and clean water and dried using a soft cotton cloth. Bath cleaning products, even non scratch ones could damage the finished surface.
